

About Daylight

Daylight is the decentralized energy company, built for the people that power it. We help homeowners lower their energy bills, keep the lights on during outages, and earn rewards for supporting a smarter energy network.

About Daylight Energy Subscriptions

Daylight Energy Subscriptions provide immediate monthly savings on your energy bill and backup power to protect you against power outages during extreme weather and grid failures.

When you subscribe, Daylight installs solar panels on your roof and provides a backup battery to store power at no upfront installation cost to you.

As part of our community energy network, we'll use your energy system to occasionally support power grids, helping lower end costs to our customers. This allows us to align our business model with you. Better power for you, more power for the grid.

HOW IT WORKS:

1. **Qualify**
   Take a quick assessment
2. **Customize**
   Daylight designs your system
3. **Install**
   Full-service setup and maintenance
4. **Earn**
   Rewards for powering the network
